

Sous

your personal sous chef

Personalized Recs

Using an algorithm driven by user preferences and activity, Sous understands the needs of each user and gives recipe recommendations personally tailored to each user's cooking habits, taste, cooking abilities, and cuisine preferences.

Difficulty Slider

AI-powered difficulty slider tailors recipes to the user's skill level, simplifying steps and ingredients for beginners or adding complexity for experienced cooks.

Smart Search

Natural language search model understand needs of users beyond basic recipe names such as occasion, ingredients, cuisines, difficulty, or dietary preferences

Meal Planning

Intelligently optimize ingredients across multiple meals, ensuring users use up what they buy while creating delicious, varied dishes.

Digital Pantry

Users can upload receipts to fill their digital pantry allowing Sous to recommend recipes with ingredients they know the users have. Sous will also intuitively recommend certain ingredients that are "staples" when it thinks the user may be running low.
